TRUTH IS IN THE DETAIL

DRAMATICALLY IMPROVE YOUR PROCESSES WITH A TAGARNO

TAGARNO HD TREND

FEATURES AND BENEFITS

High magnification levels (322X) and 20x optical zoom
Large workspace area beneath the camera
Easy measurements with Measurement Software (TMS)
Effortless image capture to SD card and PC (via TMS)
Great 720p image quality and ultra fast framerate 60fps

ACCESSORIES

XPLUS control box	Coaxial light
Lens +3, +4, +5, +10, +25, +32	Ring light kit
FHD monitor 22" and 24	Height Adjustment Table
Foot switch	Ultra Violet ring light
XY-Table	Infrared ring light
Circular tilting table	Measurement Software (TMS)

Ideal for inspection of bare solder boards, connectors or assembled boards during SMT-processes. Detect cracks in soldering, spot solder on components, dewetting or bridging in small components. Facilitate your hand soldering of very fine pitch electronic components.

- User-friendly all-in-one solutions, which make it easy to use with little or no training at all
- Great 1080p image quality and 60fps provide ultra-sharp details and an undelayed screen image
- Microscopes made only from high quality materials and surface treatments for a long lasting product
- Obtaining ergonomic correct working postures provides less sickness absence and higher efficiency
- Enriched communications and dynamic ways of cooperation between coworkers, customers and partners
- Easily detect and describe problems to multiple viewers simultaneously in person
- Create easily shareable high-quality documentation via a single snapshot
- Excellent conditions for internal or external training and sparring
