

# Solder Tip Cleaner

## AC-STC

## Introducing the Solder Tip Cleaner AC-STC

**Solder tips represent a significant part of the cost of ownership for a solder station.**

Oxidation on the tip degrades performance by creating a barrier that decrease the thermal transfer of the heat to the solder joint. This barrier slows performance and if not corrected will damage the tip. Proper tip care is essential to maximize the life of the tip.

Metcal's new Solder Tip Cleaner removes oxidation and **extends the life of the solder tip**. Using the tip cleaner easy, the tip cleaner senses the tip inserted into the unit and activates automatically saving the operator time. A replaceable brush system pulls excess solder away from the tip into a removable collection tray for disposal while removing oxidation from the tip. A splashguard prevents debris from escaping the collection area. The unit ships with a universal AC power adapter that ensures the unit is ready for use on the bench anywhere in the world.

### Features & Benefits

- Contactless Activation
- **Compact Foot Print:** Surface area on the bench top is at a premium. This unit doesn't disappoint, taking only minimal footprint on your benchtop.
- **Replaceable Brush System:** Allows for easy replacement of the solder brush providing for a long useful life for the system.
- **Universal Power Supply:** Simple plug and play any where in the world.
