

SMD Tape Connectors for 8, 12, 16, 24 mm

Steierform 87-12502

Tape connectors guarantee precise and secure connections of SMD tapes in taping and pick & place machines. Inefficient joining of SMD tapes causes unnecessary stoppages in automatic pick and place machines. SMD Tape Connectors avoid these problems by precision joining of two tapes and ensuring that the covertape can be peeled back automatically and without interruption.

Supplied in rolls of 1.000 pieces. Colour: yellow.

Order No	Format
3.0749.00	for 8 mm Tapes
3.0712.00	for 12 mm Tapes
3.0716.00	for 16 mm Tapes
3.0724.00	for 24 mm Tapes

SMD Tapes Connectors in cut lengths, for 8,12,16, 24 mm

Steierform 87-12502

Cut lengths of Tape Connectors can be more convenient and save time. All sizes are available in cartons of 1.000 pieces.

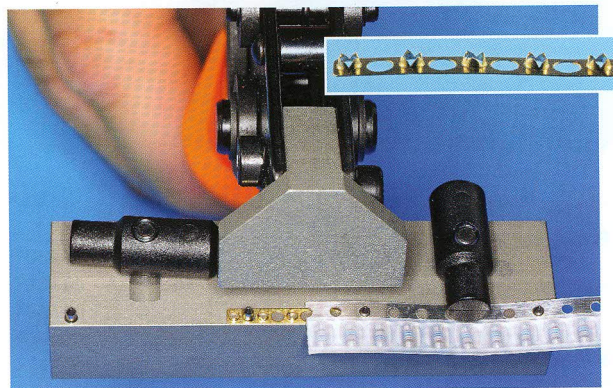

Order No	Format
3.0649.00	for 8 mm Tapes
3.0612.00	for 12 mm Tapes
3.0616.00	for 16 mm Tapes
3.0624.00	for 24 mm Tapes

This material is also available uncut on rolls. Please see pages 26/27

SMD Splicing Tools

For the professional splicing of your components tapes you can use one of our SMD Tape Splicing Tools, together with the corresponding Brass Shims and our Tape Connectors. These are suitable for any width of tape.

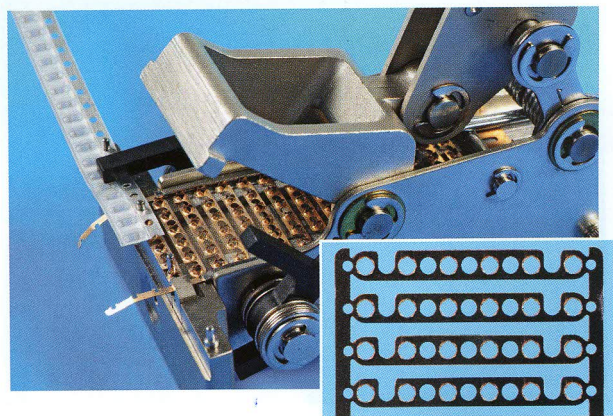

SMD „Mono Pliers“ + SMD Brass Shims for „Mono Pliers“

Developed and patented in Germany, handy, reliable and light. This Splicing Tool has an anvil with pin location for the tape right throughout the process. SMD Brass Shims for „Mono Pliers“ 4.000 Individual Brass Shims per box

Order No	
3.0001.00	„Mono Pliers“
3.0002.00	Shims for „Mono Pliers“

SMD „Cartridge Shims Tool“ + SMD Cartridge Brass Shims

Quick and cost effective. Works on a similar principle to a stapler with 20 shims per cartridge; there is therefore no need to insert individual shims. SMD Cartridge Brass Shims: 200 Cartridges with 20 shims each = 4.000 Shimes per box.

Order No	
3.1111.00	„Cartridge Tool“
3.2222.00	Shims for „Cartridge Tool“
